Kyiv, Ukraine

Objectives

Self-taught, diligent web developer aimed for creative solutions and team work. Developed a series of landing pages and native JS apps with implementation of fundamental approaches and requirements. Looking for team of professionals to collaborate and evolve with by sharing and gaining new experience and achievements.

Skills

- ✓ HTML5/CSS3 (responsive, flexbox, grid, animation)

- ✓ JavaScript (DOM, ES6, AJAX), jQuery

- ✓ PUG/SCSS/Bootstrap/BEM, Gulp/Webpack, npm/git-cli, Photoshop

- ✓ Node/Express.js, basic MongoDB/CRUD/MVC

Projects

Test Drive (JS, HTML, CSS) – Interactive UI that covers basic car behavior functionality (start, drive, stop, refuel) via instance of class object with all required properties and methods for logic and conditions.

Memorizer (JS, HTML, CSS) – Minimal UI that prompt to select a number of words in certain range. After generating, rendering and disappearing, user required to repeat words in arbitrary order. Also provided with check and hint options.

Quotes (JS, Express, MongoDB, PUG, Bootstrap) – Simple app enable to fill inputs for author and content, save all data in cloud service and render on main page. Every quote can be redirected on single page with current data.

Startup (CSS flexbox/grid, Gulp, jQuery) – Single landing page, build with "Gulp" workflow and cropped details from photoshop, semantically structured page sections and UX. Included jQuery sliders and responsive layout.
